

Binance Virtual Sub Account Creation & API Setup Guide

To facilitate asset management and strategy execution on Binance, follow this complete step-by-step guide to create a virtual sub account, transfer assets, and generate API access.

I. Creating a Binance Virtual Sub Account

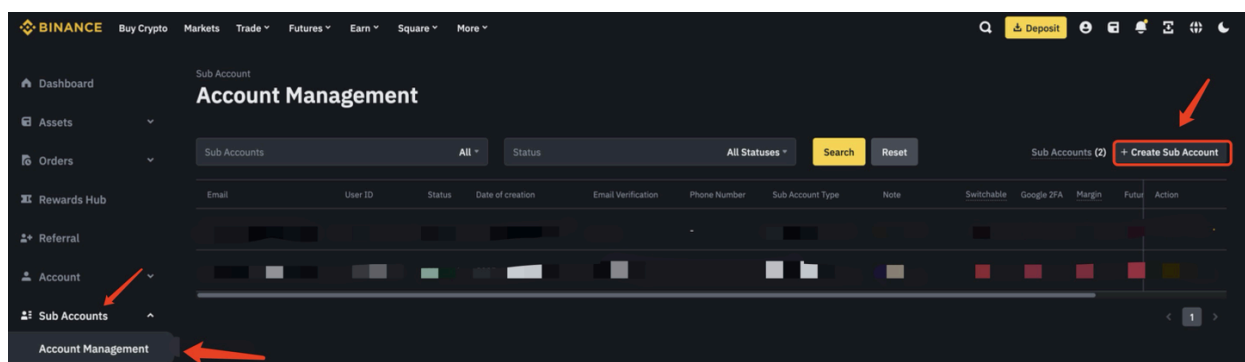

1.1 Go to Account Dashboard

After logging into your Binance account, click your profile icon in the top right corner and navigate to **“Dashboard”**.

1.2 Access the Sub Accounts Management Page

From the left-hand menu on the Dashboard page, click **“Sub Accounts”** to enter the **“Account Management”** section. Click the **“Create Sub Account”** button on the right side of the page.

1.3 Create a Virtual Email Sub-Account

In the email creation dropdown, select **“Create with virtual email”**. Then, input an account name (e.g., *tokrio*) and click **“Create Sub Account”**.

The image shows two side-by-side screenshots of the 'Create Sub Account' dialog. The left screenshot shows the 'Create with virtual email' option selected in the dropdown. The right screenshot shows the account name 'tokrio' entered in the input field, with a red arrow pointing to the 'Create Sub Account' button.

Once complete, your virtual sub Account will appear in the list, indicating successful creation.

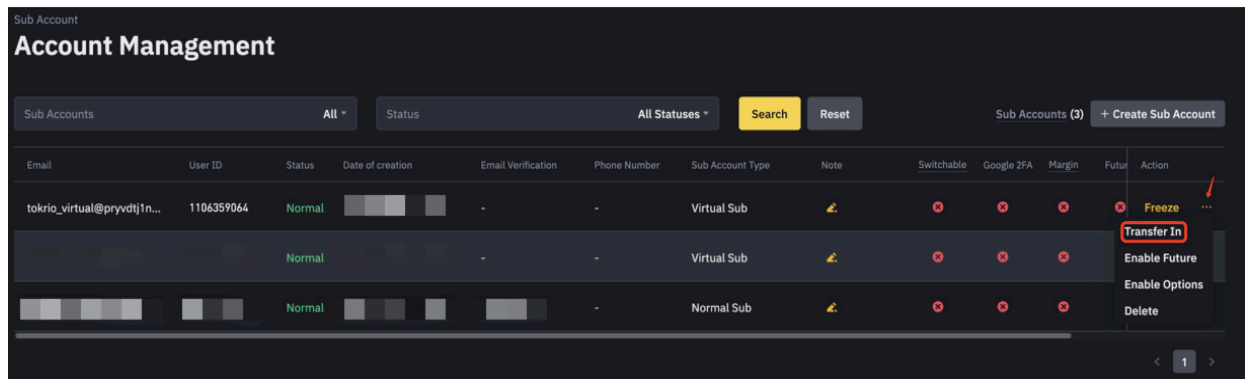

The image shows a screenshot of the 'Account Management' page. It displays a table of sub-accounts. The first row, representing a virtual sub-account, is highlighted with a red box.

Email	User ID	Status	Date of creation	Email Verification	Phone Number	Sub Account Type	Note	Switchable	Google 2FA	Margin	Futures	Action
tokrio_virtual@privdtj1n...	1106359064	Normal		-	-	Virtual Sub						Freeze ...
		Normal		-	-	Virtual Sub						Freeze ...
		Normal				Normal Sub						Freeze ...

II. Transferring Assets from Main Account to Sub Account

2.1 Initiate Asset Transfer

In the sub-account list, click the yellow “...” button next to the sub-account and select **“Transfer In”**.

2.2 Configure Transfer Details

Select the following options:

- From Account: **Main Account (default)**
- To Account: **The virtual sub-account you just created**
- Asset: e.g., **USDT**
- Amount: e.g., **100**

Double-check the information and click **“Confirm”** to complete the transfer.

III. Generate API for Sub-Account & Authorize Trading Access

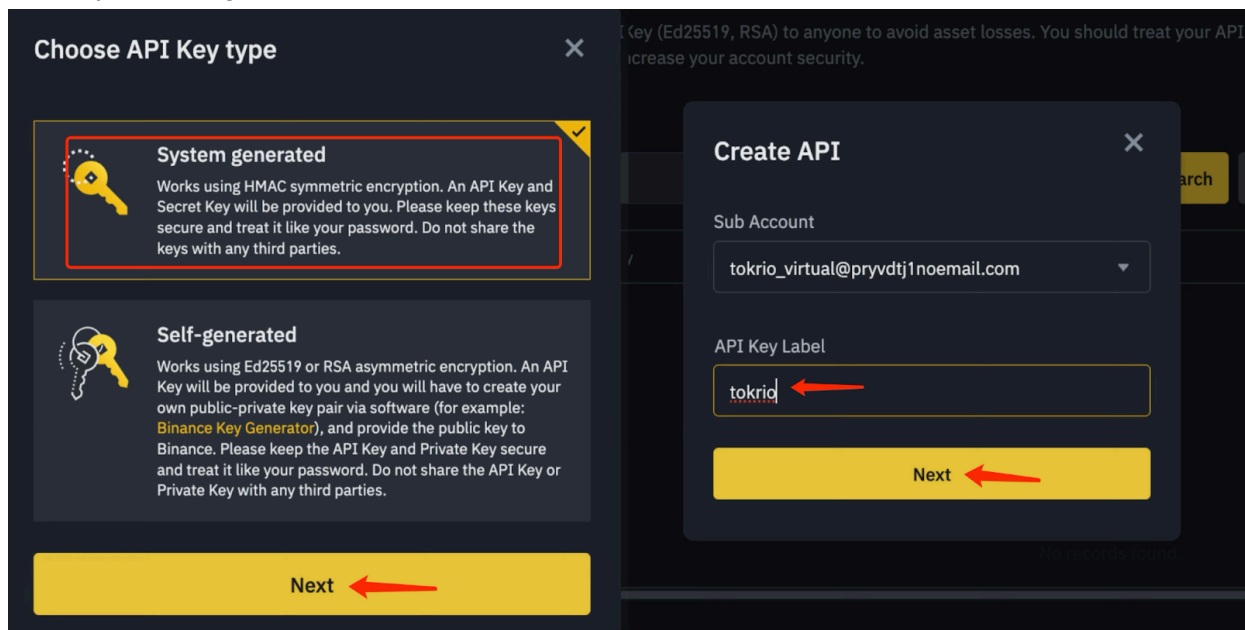

3.1 Access API Management

In the left-hand menu under **“Sub Accounts”**, go to the **“API Management”** page. Ensure the correct sub-account is selected (as shown in the red box), and click **“Create API”** on the right side.

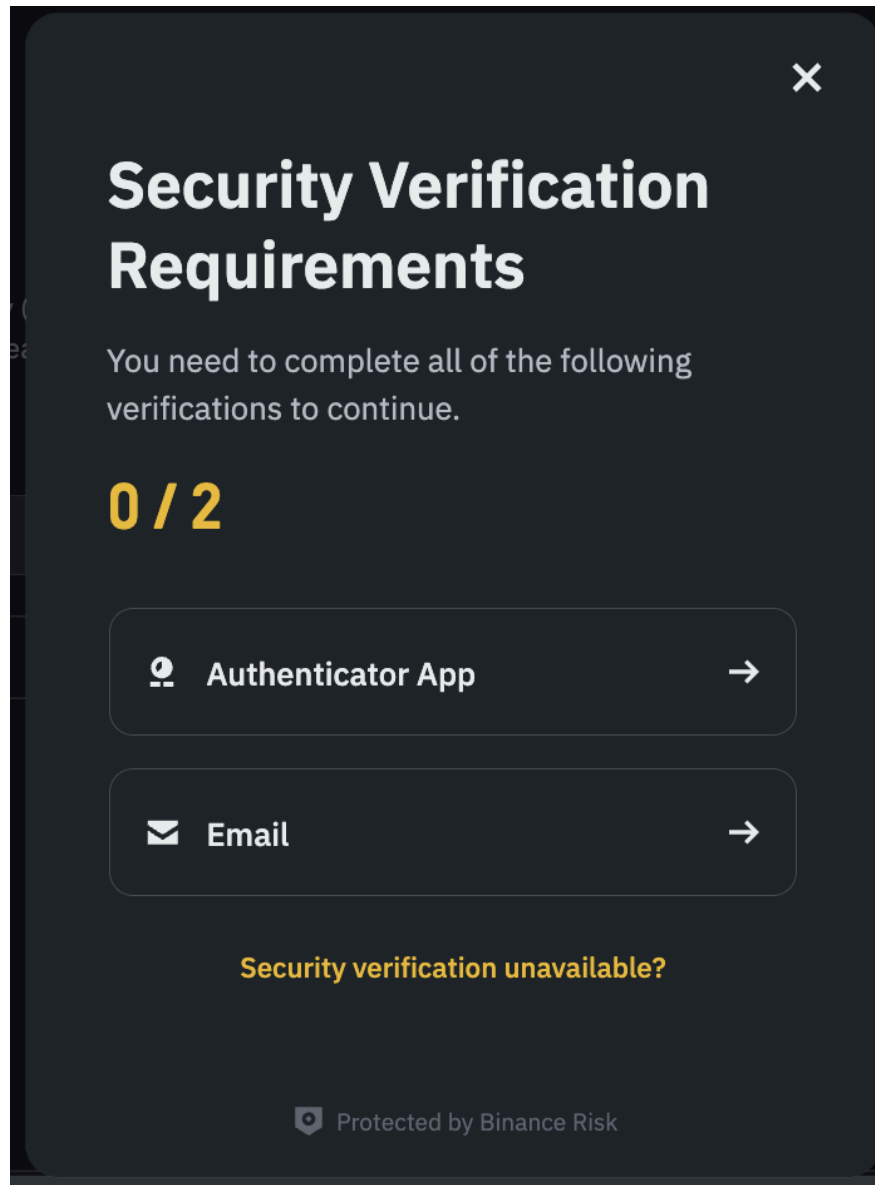

3.2 Set API Label

Choose **“System Generated”** and click **“Next”**. Select the target sub-account and name the API Key label (e.g., *tokrio*).

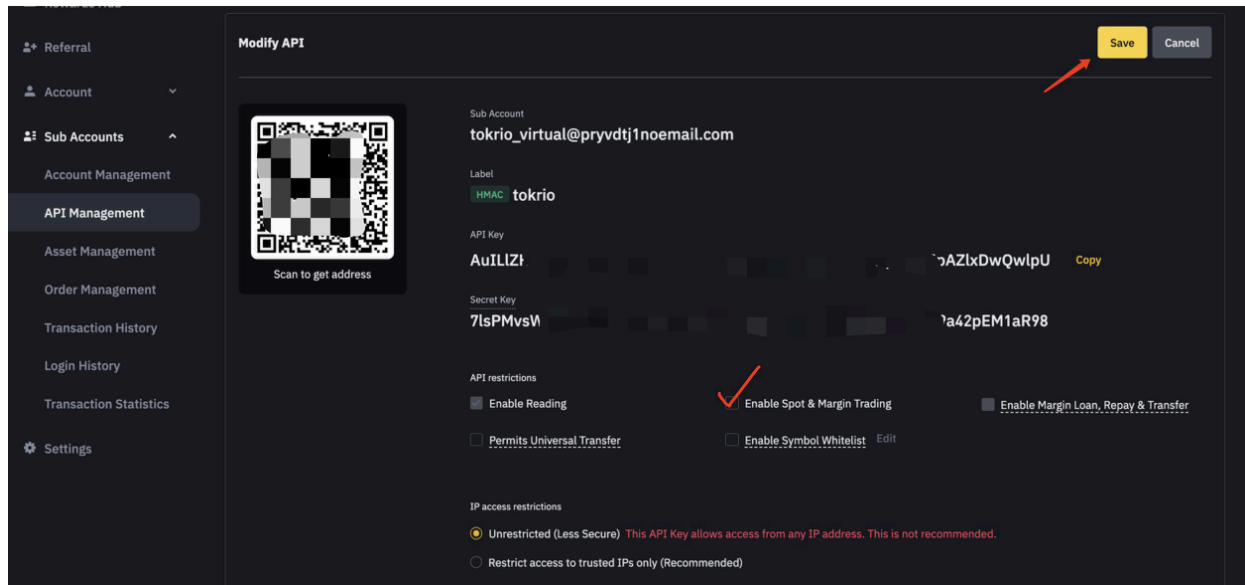

3.3 Complete Security Verification

Follow Binance’s instructions to complete 2FA verification such as Google Authenticator, email, or SMS verification.

3.4 Set Permissions and Save

In the API details page, check the box for **“Enable Spot & Margin Trading”**, then click **“Save”** in the upper right corner.

Your API is now successfully created and ready to be connected to your trading strategy system.

🔔 Important: After creating the API, Binance will only show your Secret Key once. Please copy and save them securely. You will not be able to view the Secret Key again once you leave the page. ⚠️
